**DOG FOOD:** The Chicken, Rice, Lamb and Wheat formula is nutritionally complete and balanced for all stages of your pet's life according to AAFCO Nutrient Profiles for Dog Foods.

- No Artificial Colors or Flavors, By-Products, Chemical Preservatives, Ethoxyquin, BHA or BHT.
- All Natural Ingredients - plus Essential Vitamins and Minerals. (Chelated) **READ THE LABEL ON PET FOODS**

Our Chicken Meal and other meat sources do not contain poultry by-products or other by-products like chicken feet, chicken heads, duck heads, beaks, feathers, fish heads, hides, hoofs and intestines. There are no breakfast food by-products, corn, cottonseed, corn cobs, citrus pulp, soy beans, fillers, and no screening or other foreign materials such as noxious weeds, straw, hulls or chaff in our product. Most brands of dog food include some of these byproducts and chemical preservatives. The use of low quality products and chemical preservatives may be associated with dry skin, allergic reactions, dental disease, poor health and degenerative organ dysfunction. The average dog (44 lbs) can consume 26 lbs of preservatives each year.

**OVEN-BAKED KIBBLE** *Right away you'll notice the difference!* The Flint River Ranch formula is **TWICE OVEN-BAKED** under carefully controlled conditions and temperatures - resulting in better nutrition, palatability and digestibility for your pet. The ultimate in premium nutrition and gourmet dining! Oven-baking changes hard to digest starches into easy to digest dextrins, which are readily absorbed into your dog's system. The secret to good nutrition is not how many nutrients are present in a dog's food, but rather, how available they are and how efficiently they can be utilized when digested. The good value is baked-in, not sprayed on. Because the Kibble is high density, **you feed 20%-25% less than other foods**. Each serving delivers maximum nutrition without fillers, so you'll also notice a lower stool volume and less clean-up. The Chicken and Lamb formula is made with rice and wheat. Ordinary dog foods are made with corn. Rice and Wheat are easier to digest than corn; therefore, easier on your dog's system. Various selected parts of the wheat berry are used along with whole-wheat flour as it is one of the most nutritionally balanced grains. A combination of grains provides better nutrition than one grain. There is no sprayed-on additive or greasy coating to make the taste acceptable. Ordinary dog foods are extruded under high pressure and extreme temperatures and then sprayed with fat and other products in order to encourage dogs to eat.

**DO THE TASTE TEST!** *Take two clean bowls. Place your regular dog food in one and the Flint River Ranch Food in the other and watch. YOUR DOG WILL TALK TO YOU.*

When you buy dog food, you're looking for nutrition. Studies have shown that dogs were required to eat 3 to 4 times as much of an economy brand than a premium food to provide proper nutrition. FLINT RIVER RANCH dog food will be **cheaper to feed** than other food costing less. You will be able to see the difference in your dog's healthy skin, coat and energy level. Healthy nutrition can also mean fewer medical bills. We believe your dog deserves the best possible food and health.
